

CONTENTS OF VOLUME 83

NUMBER 1—SEPTEMBER 1994

Theoretical study of the low-lying states of GeC By F. L. SEFYANI, J. SCHAMPS and J. M. ROBBE	1
Response theory analysis of a thermodynamic temperature quench By R. K. SCHMIDT and D. J. EVANS	9
Liquid films on heterogeneous surfaces: a density functional approach By G. CHMIEL, A. PATRYKIEJEW, W. RZYSKO and S. SOKOŁOWSKI	19
N₂ monolayers physisorbed on graphite: the herringbone transition revisited By D. MARX, S. SENGUPTA, O. OPITZ, P. NIELABA and K. BINDER	31
Inelastic neutron scattering from classical systems. Stationary phase approximation of the scattering law By G. R. KNELLER	63
Spin coupled valence bond theory of van der Waals systems: application to LiH... He By M. A. MATÍAS, M. RAIMONDI, E. TORNAGHI, D. L. COOPER and J. GERRATT	89
Self-diffusion in the nematic and smectic A phases of an aligned fluid of hard spherocylinders By D. VAIDYA, D. A. KOFKE, SHUANG TANG and G. T. EVANS	101
Cavities in the hard sphere crystal and fluid By R. K. BOWLES and R. J. SPEEDY	113
Electron paramagnetic resonance spectrum of radical pairs in ultraviolet irradiated (NH₄)₂S₂O₈ single crystals By KUO-TUNG LIU and JIANG-TSU YU	127
Wavefunction sensitivity in quantum collision theory By L. ENO	137
Theory and simulation for associating hard chain fluids By D. GHONASGI and W. G. CHAPMAN	145
The $\nu_5 + \nu_9$ carbon-deuterium stretching combination band of ethylene-D₄: a case of almost exact accidental degeneracy of vibration levels By J. L. DUNCAN	159
Accurate electron densities from the Hiller–Sucher–Feinberg identity applied to constrained wavefunctions By M. CHALLACOMBE and J. CIOŚŁOWSKI	171
A symmetric Poisson–Boltzmann study of a three component macroion solution By C. W. OUTHWAITE, L. B. BHIUVAN and V. VLACHY	183
Announcement	191

NUMBER 2—10 OCTOBER 1994

Composite pulses in nuclear quadrupole resonance By S. Z. AGEEV, D. J. ISBISTER and B. C. SANCTUARY	193
Analysis of low-<i>J</i> perturbations in the $\tilde{B}(000)^2\Sigma^+$ electronic state of the CO₂⁺ molecular ion By J. K. G. WATSON, M. VERVLOET, J. ROSTAS and D. KLAPSTEIN	211
The internal energy of an equilibrium glass at 0 K By G. P. JOHARI and J. PEREZ	235

CONTENTS OF VOLUME 83

Cole-Cole plots for selected nonlinear dielectric phenomena in highly dipolar liquids By W. ALEXIEWICZ	245
Multiple time scale methods for constant pressure molecular dynamics simulations of molecular systems By P. PROCACCI and B. J. BERNE	255
Molecular fluids: site-site analysis and hypernetted chain results with bridge functions for Lennard-Jones dimers By P. ATTARD	273
Localization methods for distributed polarizabilities By C. R. LE SUEUR and A. J. STONE	293
Investigation of internal and external potentials acting on benzyl halides dissolved in different nematic solvents By G. CELEBRE, G. DE LUCA, M. LONGERI and A. FERRARINI	309
Modelling the reaction $\text{OH}^- + \text{CO}_2 \rightarrow \text{HCO}_3^-$ in the gas phase and in aqueous solution: a combined density functional continuum approach By M. M. DAVIDSON, I. H. HILLIER, R. J. HALL and N. A. BURTON	327
The lowest excited triplet states of lanthanide bisphthalocyanine complexes studied by time resolved electron paramagnetic resonance By SEIGO YAMAUCHI, HIDEO KONAMI, KIMIO AKIYAMA, MASAHIRA HATANO and MASAMOTO IWAIZUMI	335
The effects of finite size in molecular dynamics simulations of Langmuir monolayers By S. KARABORNI and J. I. SIEPMANN	345
Numerical solution of structure integral equation theories for two-dimensional fluid mixtures By M. KINOSHITA and F. LADO	351
Coarse grained spectra, dynamics and quantum phase space structures of H_3^+ By G. G. DE POLAVIEJA, N. G. FULTON and J. TENNYSON	361
A molecular dynamics simulation study of chloroform By I. G. TIRONI and W. F. VAN GUNSTEREN	381

NUMBER 3—20 OCTOBER 1994

Rotationally inelastic and bound state dynamics of $\text{H}_2\text{--OH}(X^2\Pi)$ By S. M. MILLER, D. C. CLARY, A. KLIESCH and H.-J. WERNER	405
Predicting adsorption in one-dimensional zeolite pores with the exact theory of one-dimensional hard rods By M. C. MITCHELL, A. V. MCCORMICK and H. T. DAVIS	429
Computer simulations and the interpretation of incoherent neutron scattering experiments on the solid rotator phases of long-chain alkanes By J.-P. RYCKAERT, M. L. KLEIN and I. R. McDONALD	439
A reverse Monte Carlo and RISM integral equation study of liquid nitrogen By T. RADNAL, I. BAKÓ, P. JEDLOWSZKY and G. PÁLINKÁS	459
Jahn-Teller effect in the low-lying K-shell excited states of SiH_4 and their behaviour towards dissociation: an <i>ab initio</i> study By A. KOCH and S. D. PEYERIMHOFF	471
Monte Carlo methodologies for enhanced configurational sampling of dense systems: motion of a spherical solute in a polymer melt as a model problem By E. LEONTIDIS and U. W. SUTER	489
Fluids of hard convex molecules. I. Basic theory By M. S. WERTHEIM	519
Influence of heteronuclear dipolar interactions on magic angle spinning NMR spectra of solids containing isolated three-spin systems By GANG WU and R. E. WASYLISHEN	539

CONTENTS OF VOLUME 83

The determination of electric field gradients from X-ray diffraction data By A. S. BROWN and M. A. SPACKMAN	551
The molecular electric quadrupole tensor of ethene from the rotational Zeeman effect of $\text{CH}_2=\text{CD}_2$ By W. MAJER, P. LUTZMANN and W. HÜTTNER	567
Kerr effect and polarizability tensor of gaseous ethene By R. TAMMER and W. HÜTTNER	579
Quench rate independence of the hard sphere glass transition By R. J. SPEEDY	591

Research Notes

On the question of counting spanning trees in labelled, nonplanar graphs By E. C. KIRBY, R. B. MALLION and P. POLLAK	599
Monte Carlo annealing technique for the minimization of the Onsager free energy functional By D. C. WILLIAMSON and G. JACKSON	603

NUMBER 4—NOVEMBER 1994

Preliminary Communication

Separation of magnetic field effects on the photoreduction of xanthone with <i>p</i>-aminothiophenol into the effects due to the Δg and relaxation mechanisms By MASANOBU WAKASA, YOSHIO SAKAGUCHI and HISAHARU HAYASHI	613
--	-----

Papers

The decay of correlations in ionic fluids By R. J. F. LEOTE DE CARVALHO and R. EVANS	619
Plane wave and orthogonalized plane wave many-body Green's function calculations of photoionization intensities By M. DELEUZE, B. T. PICKUP and J. DELHALLE	655
Spectral spin diffusion under $n = 0$ rotational resonance By R. CHALLONER, J. KÜMMERLEN and C. A. McDOWELL	687
Rotating hinge dynamics of CO_2HF: the quantum mechanical picture By A. J. DUCKETT and M. S. CHILD	701
Rotating hinge dynamics of CO_2HF: classical mechanics and semiclassical quantization By A. J. DUCKETT and M. S. CHILD	719
A complete study of the ν_1, ν_2, $2\nu_2$ bands of ClCN with their associated hot bands By F. MEYER, J. DUPRE, C. MAYER, M. KOIVUSSAARI and G. BLANQUET	741
Local mode and normal mode stretching vibrations in XH_4 and XH_3 systems: beyond the x, K relations By M. M. LAW and J. L. DUNCAN	757
Predicting the translational-rotational coupling factor for polyatomic molecules from the self-diffusion coefficient By J. AMOROS	771
Molecular dynamics simulation of the chemical potentials of mixtures By ANPING LIU and R. GOVIND	779
Electric double-layer properties calculated in the anisotropic reference hypernetted chain approximation By H. GREBERG and R. KJELLANDER	789
Molecular dynamics study of cyclohexane in a cylindrical pore of amorphous silica By A. BRÓDKA	803
A molecular dynamics simulation of the plastic phase of hexachloroethane By A. CRIADO and A. MUÑOZ	815
Isotropic, nematic and smectic A phases in fluids of hard spherocylinders By M. ESPOSITO and G. T. EVANS	835

CONTENTS OF VOLUME 83

- Electrostatic interactions in liquid crystals: ordering of rigid solutes in nematic solvents**
By A. F. TERZIS and D. J. PHOTINOS 847

Erratum

- A comparison of constant energy, constant temperature and constant pressure ensembles in molecular dynamics simulations of atomic liquids**
By D. BROWN and J. H. R. CLARKE 867

NUMBER 5—10 DECEMBER 1994

- On the derivation of the vibrational kinetic operator for polyatomic molecules in internal coordinates**
By J. R. ALVAREZ-COLLADO 869
- Laser spectroscopic studies of terbium monofluoride: ligand field assignments of some $f^8[{}^7F]sp-f^8[{}^7F]s^2$ transitions**
By L. A. KALEDIN, J. C. BLOCH, M. C. MCCARTHY, L. V. GURVICH and R. W. FIELD 881
- Second-order corrections for transport properties of pure diatomic gases**
By E. L. HECK, A. S. DICKINSON and V. VESOVIC 907
- Nuclear magnetic resonance of one-dimensional antiferromagnets comprising nitronyl nitroxide radicals**
By F. FERRARO and D. GATTESCHI 933
- Dynamics of water molecules in barium nitroprusside trihydrate studied at low temperature by proton NMR**
By J. TRITT-GOC and N. PIŚLEWSKI 949
- Stability of the nematic phase of dimerizing aligned cylinders with respect to the smectic and columnar phases**
By R. P. SEAR and G. JACKSON 961
- Structural studies of liquid 2-bromopropane and 2-chloropropane by neutron diffraction**
By P. ZETTERSTRÖM, U. DAHLBORG and A. WANNBERG 971
- A new geometrically based integral equation hierarchy for hard-sphere systems. 1. Basic theory and thermodynamic results**
By S. LABÍK, A. MALJEVSKÝ and W. R. SMITH 983
- Exact expression for the spin 7/2 line intensities: application to solid state ${}^{59}\text{Co(III)}$ NMR**
By P. P. MAN and P. TOUGNE 997
- Third-order analysis of rotatory strengths of $f \leftrightarrow f$ transitions in chiral lanthanide systems**
By L. SMENTEK-MIELCZAREK and B. A. HESS, JR 1011
- Algebraic formulation of the product operator formalism in the numerical simulation of the dynamic behaviour of multispin systems**
By B. BOULAT and M. RANCE 1021
- Research Note**
- A computational study of the reaction of C_2 with CH_4**
By S. L. RICHARDSON and J. S. FRANCISCO 1041

NUMBER 6—20 DECEMBER 1994

- Announcement** 1045
- Relation between molecular and atomic correlation energies via overlap population**
By N. SPARTÁ, A. GRASSI, G. M. LOMBARDO, G. PICCITTO, R. PUCCI and N. H. MARCH 1047
- Reaction field, screening, and long-range interactions in simulations of ionic and dipolar systems**
By J. A. BARKER 1057
- Conformational properties of linear and star polymers grafted to a solid surface**
By T. A. CHEREPANOVA and A. V. STEKOLNIKOV 1065
- Spin polarization transfer during intramolecular triplet-triplet energy transfer as studied by time resolved EPR spectroscopy**
By KIMIO AKIYAMA and SHOZO TERO-KUBOTA 1091

CONTENTS OF VOLUME 83

<i>Ab initio</i> calculation of dipole moment functions: application to vibrational band intensities of H₂O By H. G. KJAERGAARD and B. R. HENRY	1099
Biased motion about the long molecular axis in 'ordered' smectic phases as studied by deuterium NMR relaxation By X. SHEN and R. Y. DONG	1117
Geometric phase in NMR interferometry experiment By N. R. SKRYNNIKOV and B. C. SANCTUARY	1133
Some new Numerov-type methods with minimal phase lag for the numerical integration of the radial Schrödinger equation By T. E. SIMOS and G. MOUSADIS	1145
A single-crystal ESEEM study of Fe(CN)₆³⁻ doped into K₃Co(CN)₆. Indications for a structural phase transition By J.-P. WILLEMS, E. J. REIJSE and E. DE BOER	1155
Stability of fluids with more than two components. I. General thermodynamic theory and concentration-concentration structure factor By D. GAZZILLO	1171
Magnetic and spectroscopic high spin-low spin properties of Fe(III) sulphide complexes with extended structures By H.-H. SCHMIDTKE, U. ROSELLEN and M. DIEHL	1191
Theory and simulation of associating fluids: Lennard-Jones chains with association sites By E. A. MÜLLER, L. F. VEGA and K. E. GUBBINS	1209
A new geometrically based integral equation hierarchy for hard-sphere systems. 2. Pair and triplet background correlation functions By W. R. SMITH, S. LABÍK, A. MALJEVSKÝ and J. ŠEDLBAUER	1223
Hot bands in the region of the ν_3 band of HCCI: the Fermi resonance $\nu_5 = 1/\nu_5 = 2$ By A.-M. TOLONEN, S. ALANKO, R. PASO, V.-M. HORNEMAN and B. NELANDER	1233
Diverging seventh virial coefficient of sticky discs By B. BORŠTNIK and G. STELL	1243
A computer simulation study of probe molecule behaviour in lipid bilayer systems By U. A. VAN DER HEIDE and Y. K. LEVINE	1251
The fluorescence excitation spectrum of deuterated ammonia in the region 105–200 nm: the \tilde{E}, \tilde{F} and \tilde{G} states of ND₃ By C. J. APPS, M. J. BRAMWELL, J. L. COOPER, J. C. WHITEHEAD and F. WINTERBOTTOM	1265
The gas-liquid coexistence region of a primitive model electrolyte in the mean electrostatic potential approach By E. GONZÁLEZ-TOVAR and C. W. OUTHWAITE	1273
Third virial coefficient and the hard convex body equation of state By T. BOUBLÍK	1285
Research Note	
Drying transition at a square-well wall By C. XIAO and J. S. ROWLINSON	1299
Index of Authors (with the titles of papers)	1303
